Spiga⁺

- **Spiga⁺** is a completely modular management software of distributors, dealers, official services and workshops.
- This product developed using the latest technology, controls all the managing cycles of these businesses.

OUR ORIGIN

- **Spiga+** was born from a desire to improve the management in our dealers, as the systems we had did not permit to develop our operative in an effective way.
- We created **Spiga+** based on an in-depth knowledge of the issues and requirements of the industry, our experience and the natural evolution of the business procedures.

The automatization of the processes is done in an effective and simple way amongst the departments, updating all the transactions on real time.

Aimed to distributors,
dealers and workshops.

Totally adapted to
the business logic.

The system includes all
the management cycle.

INTEGRATION WITH THE LAST SCANNING PROCESSES

- Study the digital integrations with the different manufactures. Certificates.
- We customize the communication interfaces required to our customers.
- Integration with CRM and with online and used vehicles platforms.
- Our Business Intelligence helps to develop a rich set of strategies, applications and technical architecture, focused on the administration and creation of business knowledge.
